The Hong Kong University of Science and Technology (Guangzhou) Dataset Release Agreement

rPPG for People in High Cognitive Workload Dataset (HCW)

Principal Investigator(s): Dr. Jiyao Wang and Prof. Dengbo He

Introduction:

rPPG for People in High Cognitive Workload Dataset (HCW), comprising about 20 hours (2160K frames) of recordings from the in-front webcam of 41 subjects. The dataset was designed to capture videos with greater representation across people in real-world workspaces and abnormal psychological states. HCW is comprehensive with two physiological labels (BVP and RESP) in '.mat' format. Users can preprocess it following https://github.com/WJULYW/HSRD. The dataset is released with the publication 'PhysMLE: Generalizable and Priors-Inclusive Multi-task Remote Physiological Measurement'.

Release of the Database:

To advance the state-of-the-art in human recognition and healthcare, to the extent permitted by law, the HCW dataset will be made available to researchers on a case-by-case basis only. All requests for the HCW dataset must be submitted in writing to the Hong Kong University of Science and Technology (Guangzhou)(HKUST(GZ)) by the researcher's institution on behalf of the individual researcher or research unit. To the extent permitted by law, to receive a copy of the HCW dataset, the researcher's institution or organization must sign this document and agree to observe the restrictions listed below. In addition to other possible remedies, failure to observe these restrictions may result in revocation of permission to use the data as well as denial of access to additional datasets distributed by HKUST(GZ). The dataset will be distributed over the Internet to licensees only. There will be no charge for data made available and downloaded via the Internet.

In the event of renewal, HKUST(GZ) reserves the right to adjust the terms and conditions of the license, including but not limited to imposing additional restrictions or requirements based on the then-current value and nature of the HCW dataset and the Licensee's prior usage compliance.

Licensee shall submit an annual written report to HKUST(GZ) Principal Investigator by [date] each year, detailing the progress of research using the HCW dataset, including but not limited to research findings, publications, modifications made to the dataset (if any with prior approval), and plans for subsequent use. HKUST(GZ) reserves the right to conduct an audit of Licensee's use of the dataset upon reasonable notice.

HKUST(GZ) reserves the right to unilaterally terminate this Agreement and the license granted herein immediately upon written notice to Licensee if any of the following events

occur: (a) Licensee breaches any material provision of this Agreement and fails to cure such breach within thirty (30) days of written notice; (b) Licensee uses the HCW dataset for commercial purposes without prior written approval; (c) Licensee fails to submit the annual usage report as required; (d) Licensee undergoes a change in control that may affect the intended research purpose; or (e) continuation of the license would pose a significant risk to the privacy or rights of the original subjects of the dataset.

The license granted herein shall be valid for three (3) years from the date of signature by HKUST(GZ) Principal Investigator. Upon expiration, Licensee must submit a new application for renewal and obtain written approval from HKUST(GZ) to continue using the HCW dataset.

Consent:

The researcher(s) agrees to the following restrictions on the HCW dataset:

1. Redistribution:

Without prior approval from HKUST(GZ) Principal Investigator, the HCW dataset, in whole or in part, will not be further distributed, published, copied, or disseminated in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a different facility or organizational unit within the requesting university, organization, or company. Any violation of this restriction shall result in the Licensee paying liquidated damages of ￥50,000 for each unauthorized distribution incident, and the A univercity shall have the right to pursue additional compensation for any actual losses exceeding this amount.

2. Protection of de-identification:

There shall be no attempt made to defeat the de-identification of the data provided.

3. Destruction:

Licensee agrees to destroy all unmodified and modified copies of the dataset, including any derivatives thereof, within thirty (30) days upon the expiration of the license term specified herein, or upon termination of this Agreement for any reason, and shall provide a written certification of such destruction to HKUST(GZ) Principal Investigator. Licensee further agrees to destroy all copies of the dataset, or to destroy all copies of the dataset, if requested by HKUST(GZ) Principal Investigator at any time.

4. Modification and Commercial Use:

Without prior approval, the HCW dataset, in whole or in part, may not be modified or used for commercial purposes. The license granted herein is specifically for the licensee named below and prohibits any commercial use. Licensee shall not duplicate or use the disclosed

dataset, its contents, or any data, logo, mark, or phrase associated with or owned by HKUST(GZ) to manufacture, promote, or sell products or technologies (or portions thereof) either directly or indirectly for commercialization or any other direct for-profit purpose without the prior written permission of HKUST(GZ).

5. Publication Requirements:

Those seeking to include rendered images of more than 10 images from the HCW dataset in reports, papers, and other documents to be published or released must first obtain approval in writing from HKUST(GZ) Principal Investigator. In no case should the images be used in a way that could cause the original subject embarrassment or mental anguish.

6. Citation:

All documents and papers that report on research that uses the HCW dataset must acknowledge the use and source of the dataset by using the following citation or BibTex form:
Wang, J., Lu, H., Wang, A., Yang, X., Chen, Y., He, D., & Wu, K. (2025). Physmle: Generalizable and priors-inclusive multi-task remote physiological measurement. IEEE Transactions on Pattern Analysis and Machine Intelligence.

7. Publications to HKUST(GZ):

A copy of reports and papers with related code that are for public or general release that use the HCW dataset must be forwarded immediately upon release or publication to HKUST(GZ) Principal Investigator.

8. Indemnification:

Researcher agrees to indemnify, defend, and hold harmless HKUST(GZ) and its officers, employees and agents, individually and collectively, from any and all losses, expenses, damages, demands and/or claims based upon any injury or damage (real or alleged) except to the extent permitted by law, when caused by the gross negligence or willful misconduct of HKUST(GZ), and shall pay all damages, claims, judgments or expenses resulting from Researcher's use of the HCW dataset, as determined by the court.

Submission Instructions:

Please scan and dispatch the completed agreement via your institutional email to jwanggo@connect.ust.hk and **cc** dengbohe@hkust-gz.edu.cn. The email should have the subject line: "HCW Access Request - your institution." In the email, outline your institution's past research and articulate the rationale for seeking access to the HCW, including its intended application in your specific research project.
